Syllabus for Math 6342 Point-Set Topology, Fall 2015

Instructor: Dr. Mark Tomforde

Office: 601 PGH

Instructor Web Site: www.math.uh.edu/~tomforde

Course Web Site: www.math.uh.edu/~tomforde/Math6342F15.html

Office Hours: MW 3-4PM (or by appointment)

Note About Office Hours: I encourage you to come by my office if you have any questions, need help with homework problems, or would just like to talk about the material.

Meeting Times: MWF Noon-1PM in 108 C.

Optional Problem Session: Friday 1PM-2PM in TBA

Prerequisites: Completed or concurrent enrollment in a senior undergraduate course in Real Analysis (e.g., MATH 4331 at UH).

Course Description: This course is an introduction to point-set topology. Topics include compactness, connectedness, quotient spaces, separation properties, Tychonoff's theorem, the Urysohn lemma, Tietze's theorem, and the characterization of separable metric spaces.

It is expected that students will be proficient in reading and writing proofs. Proofs in homework should be written in textbook style. In particular, you should keep the following in mind:

- (1) Writing mathematics requires full English sentences, with the understanding that certain mathematical symbols can replace the words they represent. (So, for instance, the phrase "x is a member of the set of real numbers and x^2 is not equal to 4" may be written as " $x \in \mathbb{R}$ and $x^2 \neq 4$ ".)
- (2) When you write up a proof I will grade it for the way it is written as well as the ideas that are in it. Consequently, you should follow the rules of English usage, such as using proper grammar and punctuation.
- (3) Your proofs will be graded on the degree to which they are: Correct, Clear, and Concise.

Text: The textbook used for this course is *Topology* (2^{nd} *Ed.*), by James R. Munkres.

Course Web Page: The course web page is located at

www.math.uh.edu/~tomforde/Math6342F15.html

On the course web page you will find the homework as it is assigned, as well as a copy of this syllabus, exam dates, and announcements as they are made.

Grading: The final grade for the class will be determined as follows:

 Class Participation:
 10%

 Homework:
 30%

 Exam 1:
 20%

 Exam 2:
 20%

 Final Exam:
 20%

Attendance: It is vital to attend every lecture and take careful notes. Some lecture material does not appear in the textbook. Questions on the exams will be drawn from homework, reading, and lectures. I also encourage you to ask questions and participate in class. As stated above, 10% of your final grade will be based on class participation.

Homework: A list of homework problems will be given on the course web page every week. There will be one or two specified problems that you will be asked to write up and turn in to be graded. The other problems will not be collected, but it is important for you to do them to keep up with the material we are learning and to prepare for exams.

PROBLEMS TO BE TURNED IN: These problems (which may have multiple parts) should be written up as near to perfect as you can. Proofs should be written in textbook style, and your writing should be correct, clear, and concise. The problem will be graded on a 10-point scale, and spelling, punctuation, and grammar will count. Any proofs that you turn in should be written in "Claim . . . Proof . . ." style; i.e., when writing up proofs, you should write out the statement you are proving followed by your proof. For example, if a problem asked you to show that A and B imply C, then you

should write

Claim: If A and B, then C.

Proof: Since A and B hold we see that . . . argument . . . hence C.

With regards to the homework that is turned in, the following policies will be in effect:

• Homework without a name will not be accepted.

- Homework will not be accepted by email.
- Write legibly, and use only one side of the paper. Leave enough room for comments to be made when grading.
- If more than one page, your homework should be stapled in the upper-left-hand corner.
- \bullet Homework should be written on standard-sized paper (8.5" x 11"), with no "fringe" running down the side as a result of the paper having been torn out of a spiral notebook
- Solutions to homework should be written up in sequential order. (That is, #1 first, #2 second, etc., or Part (a) first, Part (b) second, etc.)
- Homework is due at the beginning of class on the day it is due. Late homework will not be accepted. Homework is considered late once I have started lecturing.
- Homework that is not picked up within two weeks of the date it is handed back will be discarded.

Points will be deducted for each rule that is not followed.

PROBLEMS NOT TO BE TURNED IN: Even though these problems will not be collected, working through them and writing them up will give you essential practice to help you learn the methods and techniques of the subject. In addition, a number of the exercises will be developed to expose you to important material that is not in the textbook or the lectures.

The optional problem session on Fridays will be a good opportunity to talk about all the problems and work through the ones you are having difficulty with.

Doing the homework is essential. Remember:

"You learn mathematics by doing mathematics."

Exams: There will be three exams: two midterm exams during the semester and one final exam at the end of the semester. Each exam will be a take-home exam.

Exam 1: Due Wednesday, Sept. 23 at the beginning of class.

Exam 2: Due Wednesday, Oct. 28 at the beginning of class.

Final Exam: Due Wednesday, Dec. 9 at Noon.

The take-home exams are to be worked on independently. You are allowed to use your notes, the course textbook, and old homework from this class. You are also allowed to talk to the instructor. You are NOT allowed to use other books besides the course textbook, information from the internet, other notes besides those you took in class, or any other sources besides the allowed ones stated above. You are also NOT allowed to talk to each other about the exam, or the problems on it, until after the time the exam is due.

Makeup Policy: In general, turning in late homework results in a score of zero. Likewise, not turning in a Take-Home Exam when it is due results in a score of zero, and you will not be allowed to make up the work.

No Class: There will be no class on Friday, November 6, because I will be out of town attending a conference. All other activities related to the course (e.g., the problem session) will also be cancelled when I am gone.

Reading Assignments: Reading assignments will be given weekly on the course web page. Completing the reading assignments is just as critical as doing the written homework. You should read the assigned sections *before* we cover them in classes, so you are prepared to answer questions or ask about material you do not understand.

Honor Principal: University of Houston students are expected to adhere to the Academic Honesty Policy (see the Student Handbook for more details). In this course this shall mean the following: Homework can and should be worked on and discussed with others. However, the write-up should be independent and in your own words. In addition, exams should be worked on independently. For take-home exams, you are allowed to use the class text-book, your class notes, your old homework, or talk with the instructor. You are not allowed to use other books, information from the internet, other sets of notes, or talk with other people besides the instructor. In addition, if you are aware of anyone who is cheating or receiving unfair outside assistance, you are honor bound to inform the instructor of what is occurring.

Policy on Incompletes: Incompletes are given only in very unusual circumstances, and never just to prevent a bad grade or provide the student with more time to prepare for an exam. Many students have misconceptions about what an incomplete is, so I have quoted part of the description from the UH Math Department policies here:

UH Math Department Policy on Incompletes: The grade of I (Incomplete) is a conditional and temporary grade given when students are passing a course but for reasons beyond their control, have not completed a relatively small part of all requirements. Students are responsible for informing the instructor immediately of the reasons for not submitting an assignment on time or not taking an examination. . . . The grade of "I" may not be changed to a grade of "W", but may only be changed to another letter grade. Students should understand that the only way to have an "I" (Incomplete) changed to a passing grade is to fulfill the specific course requirements by the appropriate date and to earn a passing average in the course. Students should not re-register for courses in which they previously received an "I" grade. . . . After the course work is completed, the instructor will submit a change-of-grade form to change the "I" grade to the grade earned. The student should understand that both grades, the original "I" and the earned grade, will appear on the transcript.

Special Needs: Any student with a disability or chronic health problem for whom special accommodations would be helpful is encouraged to discuss with the instructor the types of assistance that might be offered.

Classroom Environment: As your professor, I hold the fundamental belief that everyone has a right to learn and deserves unrestricted access to education. I also believe that everyone in this class is fully capable of mastering the material. My goal is to provide conditions that allow you to engage the material and guide you as you put forth your own effort to learn the concepts and practice the methods we cover. I value diversity, social justice, inclusion, and equality. I am therefore committed to creating a classroom environment that welcomes all students, regardless of race, gender, social class, religious beliefs, etc. If there is anything causing barriers to your inclusion or achievement, please come talk to me.

Important Dates: The following are some important dates you should keep in mind:

Important Dates:

September 7, NO CLASS, Labor Day.

September 9, Last day to Drop/Withdraw without receiving a grade.

September 23, Exam 1 due at beginning of class

October 28, Exam 2 due at beginning of class

October 30, Last day to Drop/Withdraw with a W grade.

November 6, NO CLASS, Dr. Tomforde is out of town at a conference.

November 25 – November 29, NO CLASS, Thanksgiving Break.

December 4, Last Day of Classes

December 9, Final Exam due at Noon
